

For immediate release

Thermo-Calc Software AB Launches Thermo-Calc Solutions AB to Expand Global ICME and Materials Design Capabilities

Stockholm, Sweden — June 5, 2025 – Thermo-Calc Software AB, the global leader in computational thermodynamics and materials simulation software, announces its full acquisition of QuesTek Europe AB. Formerly a joint venture, QuesTek Europe specializes in integrated computational materials engineering (ICME) services and will operate under the new name **Thermo-Calc Solutions AB**.

A Unified Brand

Leveraging Thermo-Calc Software's powerful suite of products, Thermo-Calc Solutions offers cutting-edge services in materials design, process simulations, and alloy optimization, enabling clients to accelerate product development, reduce costs, and meet performance and sustainability targets. The rebranding reflects the firm's enhanced role within Thermo-Calc Software's global vision.

"Thermo-Calc Solutions is the next step towards delivering a comprehensive ICME platform," said Anders Engström, CEO of Thermo-Calc Software AB. "Full integration enables closer collaboration, and greater innovation for our global customers."

Strength through Experience

The engineering services team, formerly operating as QuesTek Europe, brings a strong track record of solving complex materials challenges across aerospace, energy, industrial, and automotive sectors using a variety of commercial and proprietary modelling design tools and simulation-based workflows. As Thermo-Calc Solutions, the group retains its experienced personnel, robust methodologies, and client-focused mindset—while gaining broader resources and visibility within the Thermo-Calc network.

"This new name reflects our identity and mission," said Ida Berglund, Managing Director of Thermo-Calc Solutions. "Clients can expect the same dedication to innovation and engineering excellence, now more tightly aligned with the software and tools that power our work."

Enhanced Value for Customers

- Stronger integration between engineering services and Thermo-Calc's software products
- Seamless ICME workflows from simulation to material deployment
- Expanded global support in Europe, North America, Asia, and beyond
- Unified brand experience, combining software, data, and engineering solutions

About Thermo-Calc Solutions AB

The engineering services division of Thermo-Calc Software AB, offering specialized ICME solutions such as materials design, alloy composition- and heat treatment optimization. The company serves clients globally in accelerating materials innovation through simulation and modelling.

About Thermo-Calc Software AB

Based in Stockholm, Sweden, Thermo-Calc Software AB is the world's leading provider of software and databases for computational thermodynamics and materials property simulation, serving thousands of users across industry and academia in driving materials innovation.
